

GASPAR CASAL FOUNDATION

2014

17 years of research and development for health

The Gaspar Casal Foundation (FGC) is a non-profit, non-partisan think tank dedicated to improvements in healthcare with a focus in health economics, public health, and healthcare technologies evaluation.

The FGC addresses the specific needs of the healthcare system and its agents from a humanistic perspective. We use our uniquely innovative vision to tackle challenges in healthcare, taking advantage of an established network of public and private entities with whom we work in partnership. The singularity of the FGC's approach is based in this rich network of partners and collaborators, our skill at management, and an unwavering commitment to our goals.

"In times like these, when the future is uncertain and nothing can be taken for granted, we are convinced that the Gaspar Casal Foundation must surpass its prior achievements. The maturity, experience and leadership that we have developed over the years mean that the Gaspar Casal Foundation is synonymous with rigor, utility and a high quality work"

Jesús Millán Núñez-Cortés

President of the Board of the Gaspar Casal Foundation

WHAT WE DO

The projects we undertake with the objective of improving health and healthcare systems can be divided into three categories: education and training of healthcare professionals, applied research, and scientific communication.

Our principal areas of expertise are

- Public Health
- Health Economics
- Health Policy
- Clinical Management
- Health Technology Assessment

EDUCATION and TRAINING

We have many years of experience in the coordination and execution of postgraduate education (jointly with CRES and BSM at Pompeu Fabra University) and training programs, designing content and recruiting teaching staff and lecturers as well as providing logistical and technical support.

- Master on Administration and Management of Healthcare Services
- Diplomas on Clinical Management and HTA
- International programs

We particularly excel at in-company training programs, tailored programs to clinicians and on line reaching activities

APPLIED RESEARCH

We conduct a wide range research projects in all of our principal fields of expertise.

- Strategic Thinking for Healthcare: Consulting and Think Tank
- Quantitative Research
- Qualitative Research

SCIENTIFIC COMMUNICATION

The FGC is recognized as expert in the planning and execution of events designed to foster communication between the many stakeholders in the health sector, from patients to lawmakers to physicians to private companies. These activities include:

- Conferences/Forums/Debates
- Publications
- Social Media
